ENGINEERING OUTLOOK

April 2019

HARMONY PLAYGROUND

EFFINGHAM PARK DISTRICT

What a difference a year makes! Last year the Effingham Park District broke ground for the construction of Harmony Playground, an all-inclusive playground that is accessible to all children, adults, and veterans including those with special needs. Today that vision is a reality being enjoyed by the entire community.

Harmony Playground was constructed on 7.6 acre located North of Evergreen Park on North Maple Street and includes a pavilion and restroom facilities. Milano & Grunloh Engineers, LLC was honored to be a part of this forward-thinking and barrier-breaking project. We were happy to be able to donate our services, such as surveying, site plan, detention/drainage calculations, construction staking, and material testing, to such a worthy cause.

HEARTLAND FAMILY DENTAL CARE NEW OFFICE ON OUTER BELT WEST

The Tarr Group along with contractor, Wohltman Construction, recently developed the property located at the corner of Keller Drive and Outer Belt West for Heartland Family Dental Care's new dental office facility. The new 4,400+ square foot office building was constructed on a 1.60 acre lot with 22 parking spaces.

Milano & Grunloh Engineers, LLC provided ALTA and boundary surveys, site development, rezoning, detention/drainage calculations, and construction staking. Milano & Grunloh Engineers, also coordinated the sidewalk development with the City of Effingham. We would like to thank the Tarr Group and Wohltman Construction for giving us the opportunity to work on this project.

HARTKE SUBDIVISION VILLAGE OF DIETERICH

The Village of Dieterich recently completed a 38-lot subdivision next to the school. The infrastructure improvements consisted of new streets, storm sewer, sanitary sewer, and water. The total cost was \$1.9 Million. The project was completed in the fall of 2018 by Effingham Asphalt. The Village has already sold 15 of the 38 lots.

Milano & Grunloh Engineers, LLC provided site design, design engineering, and construction engineering for the project. Thank you to the Village of Dieterich for your confidence and allowing us to be a part of this project.

WATERMAIN REPLACEMENT CITY OF EFFINGHAM

The City of Effingham recently began construction on a watermain replacement project along Mulberry Street, Lawrence Avenue, Linden Street, Clark Avenue, and Franklin Avenue. These areas were experiencing multiple watermain breaks and discolored water due to the aging undersized cast iron line.

The contractor, Kieffer Bros, will replace 4,995 lineal feet of the old watermain with new 8" PVC pipe. The City will utilize \$500,000 in DCEO CDGB grant funds to offset the total cost of the project. Milano & Grunloh Engineers, LLC provided design engineering, construction engineering and grant administration for the project. We would like to thank the City of Effingham for allowing us to be a part of this project.

GRANT ADMINISTRATION

- ✓ Over \$3 Million in DCEO CDBG grant funds secured in 2019.
- ✓ Over \$48 Million in DCEO grant funds secured overall.
- ✓ Over \$100 Million in USDA Rural Development funds secured.
- ✓ 80+ years of experience applying for, managing, and administering project funds
- ✓ Milano & Grunloh Engineers' relationships with multiple funding agencies, as well as our vast knowledge of the available funding programs are key to the success of many of our projects
